

Storage carts allow multiple barriers to be picked up, moved, and stored at one time. These carts store barriers horizontally in a stack which gives the cart a small footprint. Models are available with 12, 18, 21 and 24 barrier capacities and each model is available with a version to take 2" or 2.5" diameter barriers. Standard features include padded racks, and rubber bumpers to protect walls, while selected models feature a convenient storage tray. 6"/150mm steering wheels provide excellent maneuverability and wheel locks give stability while the cart is being loaded and unloaded.
