

Jackets are an ideal way to turn your barricades into high impact billboards. However most jackets are designed to fit a specific brand of barricade. If you do not know which barricade brand you have our Throw Over Jacket design is the answer. This jacket does not enclose the hook and loop fixtures on the ends of the barricade, so it fits any 6.5' (2m) or 8' (2.5m) barricade. The full area of the jacket can be digitally printed in any number of colors. The simple "throw over" design makes fitting on the barricade fast and easy.
