

Vertical Storage Cart Single Handle

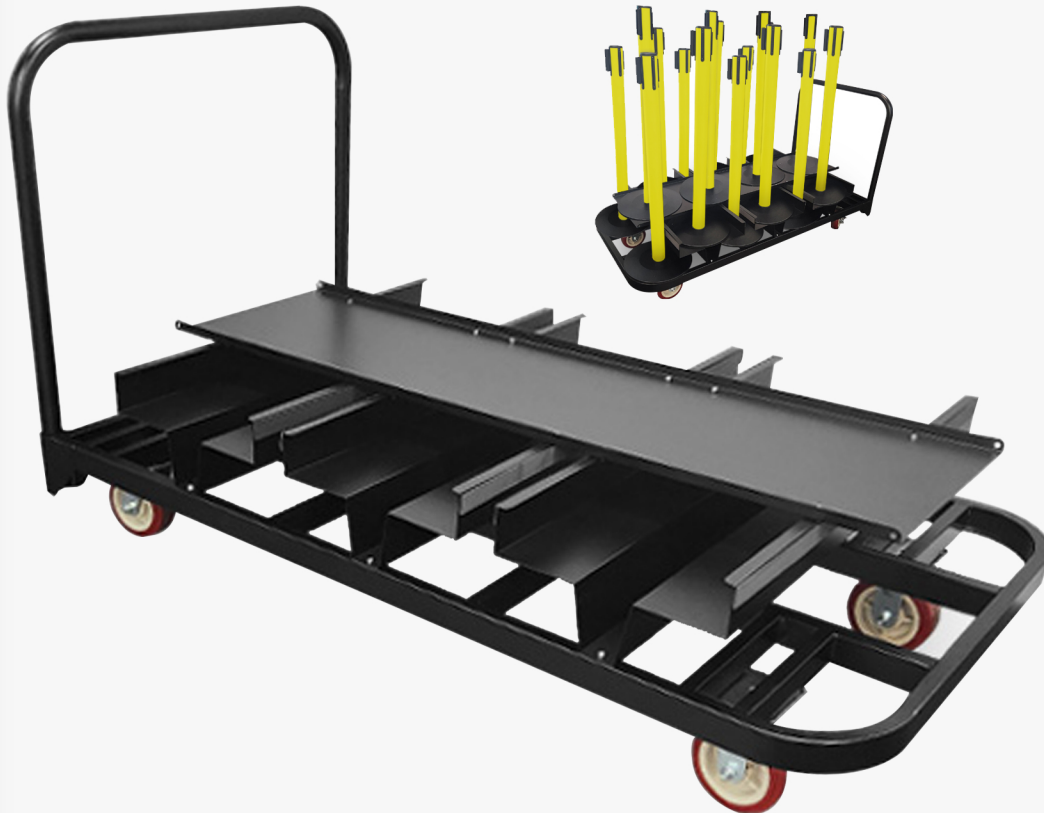

Easy Loading Stanchion Cart

877 977 7657

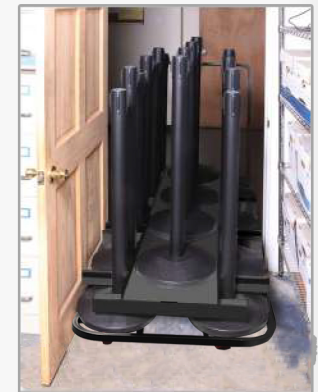

sales@queuesolutions.com

www.QueueSolutions.com

This cart has an 18 stanchion capacity and stores them standing vertically which lowers the height of the cart allowing it to fit through standard doorways. The vertical “standing” design also means stanchions only must be lifted 12”/300mm off the ground to be loaded. This design also allows the cart to be used with stanchions of any diameter. The cart features two steering wheels for great maneuverability and two locking wheels for stability during loading and unloading.

Low lift loading

Low height fits through standard doorways

6" locking wheels for excellent stability
